

About Prairie Industrial Group:

Prairie Industrial Group is dedicated to building relationships and providing unmatched quality of work to projects throughout Kansas City and the Midwest. When you work with our team, you're working with a group of industry veterans who pride themselves on doing the job safely and correctly.

Each member of our team is rigorously trained and our organization as a whole holds numerous safety and operator qualifications. Whether you're looking for hydroexcavation, industrial maintenance, or support services on your project, you can rest assured that Prairie Industrial Group won't stop until you're satisfied.

Our History:

Prairie Industrial Group was founded by a team with significant experience in the industrial service industry. Since then we have continued to grow because of our commitment to quality. From day one, the way we have differentiated ourselves is through an incomparable work ethic and passion for what we do.

As we grow in the years to come, we look forward to strengthening that commitment by continuing to perform high-quality industrial services throughout Kansas City and the Midwest.

Tank Maintenance and Cleaning

Prairie Industrial Group offers a number of industrial cleaning services, as well as tank cleanings, to job sites across Kansas City and the Midwest. Our team combines an emphasis on quality work with a thorough understanding of state and federal regulations. This helps businesses improve their processes while minimizing risk and downtime.

Prairie Industrial Group's highly trained field personnel is adept at all of the following services:

- Oil/Water Separator cleaning
- Pits and Sump cleaning
- Liquid/Heavy Sludge removal
- Track and Switch cleaning
- Above-Ground and Underground Tank cleaning
- Vessels, Sumps, and Basin cleaning
- High-Pressure Washing and Hydro-blasting
- Process/Transfer Line cleaning and jetting
- Steam and Chemical cleaning

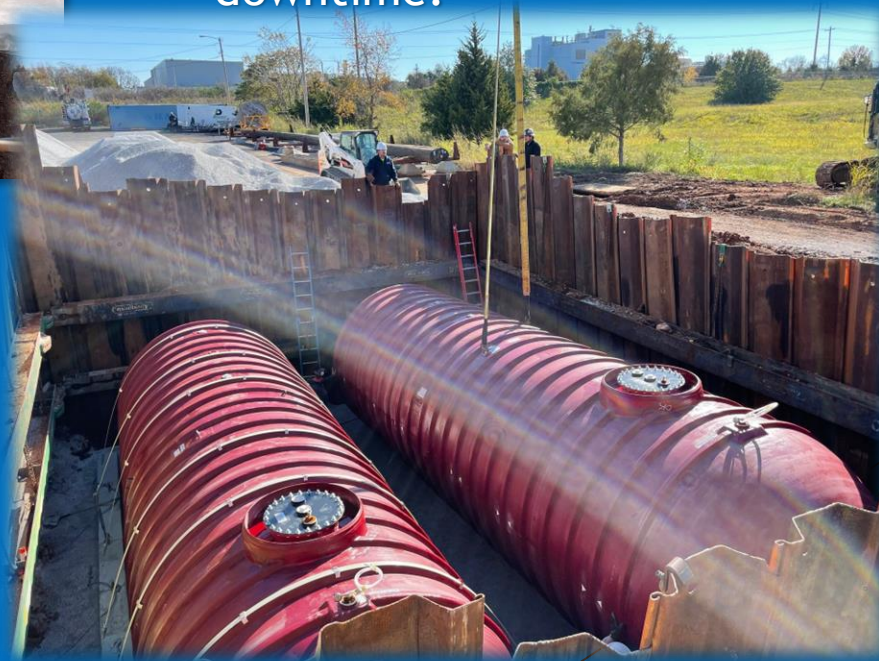

UST / AST Removal and Installation

Responsible removal & closure

With safety and a clear understanding of compliance at our forefront, Prairie Industrial Group is capable of performing a wide array of tank services for your business. This includes the removal and closure of above-ground service tanks (AST) and underground service tanks (UST). Our team of highly qualified professionals will close and responsibly remove your service tanks, while adhering to all proper safety standards including state and federal regulations to ensure risk minimization and avoid downtime.

Excavation and Site Work

Meeting all of your needs, exceeding all of your expectations

Need excavation and site work completed at your project? Prairie Industrial Group is here and ready to serve with comprehensive and reliable industrial services! Based in Kansas City with a footprint throughout the Midwest, we're capable of meeting you on site and completing our services in a timely and cost effective manner. Utilizing a fleet of cutting-edge equipment, our team of qualified operators and highly trained field personnel are dedicated to helping your business achieve long-term success.

Site Restoration

From start to finish on your project Prairie Industrial Group is armed with the equipment and personal to restore the site to pre construction conditions. We are able to preform site grading, erosion control, sod and seed replacement and general house keeping. Know that our crews have you vision in mind when completing your project.

Transportation

Responsible handling and transportation

Prairie Industrial Group is proud to offer safe, reliable material handling, transportation and dump truck services to customers across Kansas City and the Midwest region. Utilizing our fleet of trucks and premium-quality equipment, we're capable of hauling all of your materials to and from your location. Our qualified operators and highly trained field personnel make the entire process convenient and cost-effective, while working to ensure your complete satisfaction.

Waste Disposal

Responsible waste disposal for your job site

Backed with a fleet of vacuum trucks and well-maintained equipment, Prairie Industrial Group is capable of performing comprehensive waste disposal services to job sites across Kansas City and the Midwest.

Our qualified operators and trained field personnel are adept at providing timely and professional waste removal, transportation, and disposal services. Each member of our team also possesses the work ethic needed to ensure that the job is performed to your specific standards.

Tank Repair (Hot Work, Cutting, Welding)

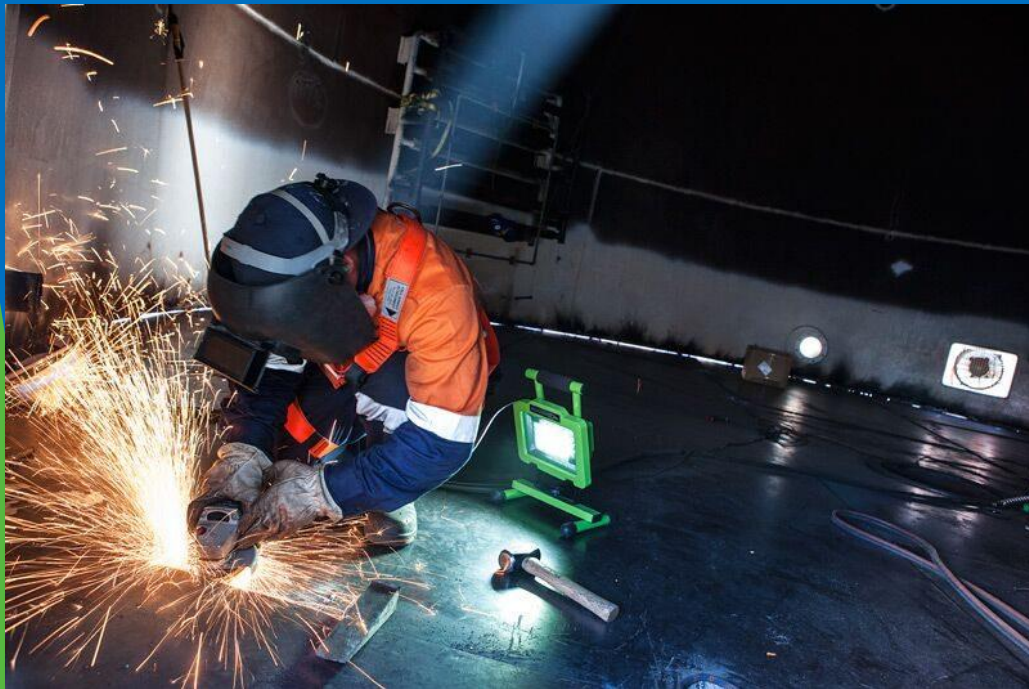

Storage tank maintenance is essential for protecting the performance and longevity of such equipment.

Regular inspection allows for the identification of existing and potential failures, so maintenance and repairs can be performed, limiting ongoing damage. Infiltrations allowing contamination, corrosion, delamination of coatings, and other tank issues are corrected, improving tank performance and reducing costs associated with performing more extensive repairs when inspections are overlooked.

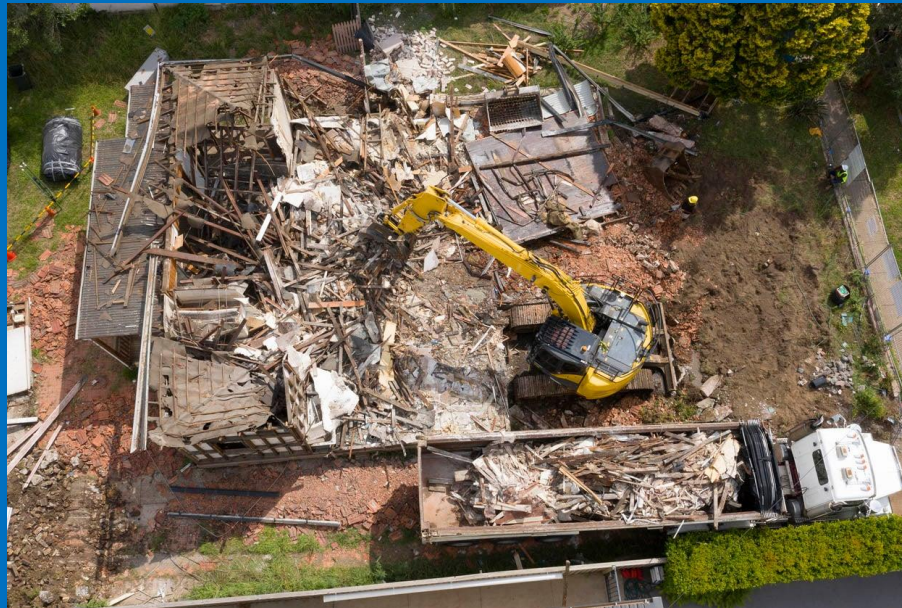

Routine cleaning and storage tank maintenance reduces the risks that negatively impact water or other fluid quality, as well as the integrity of the tank. Bacterial growth and sediment build-up are minimized protecting the tank's interior lining, reducing costs associated with recoating.

Overall, storage tank maintenance work to protect your equipment and keep it in service longer. Resolving tank issues as soon as possible eliminates costly repairs when damage becomes more significant and safeguards your tank assets.

Demolition

If you are planning a project involving commercial demolition, it is important that you work with an experienced professional for the job. At Prairie Industrial Group, we specialize in commercial demolition services, salvage and hauling, and we're available for projects of any size or scale. As a fully licensed and insured company, we serve private contractors, individuals and government agencies with confidence. When you work with us, you can rest assured that you're partnering with skillful contractors who are dedicated to giving your project their full attention.

Line Jetting

Sanitary sewer and stormwater pipes need continuous cleaning and inspection in order to ensure they are performing as designed. Stormwater systems are particularly notorious for clogging and flooding as sediment, litter, and debris settle and block off flow. That's why Prairie Industrial Group offers line jetting services to clients all across the Midwest. Armed with state of the art jetting systems we are able to tackle some of the most difficult line jetting in the industry.

Oil Water Separator Service and Cleaning

Oil water separators (OWS) are effective, but they do require periodic maintenance to perform as designed. Over time, solids accumulate in the chambers thereby reducing the capacity, flow, and effectiveness of the separator itself. If these solids are not periodically vacuumed out and disposed of, a bypass can occur which will allow oil to be discharged instead of cleaned effluent. This can lead to a permit violation and expensive compliance issues.

Prairie Industrial Group provides a turnkey solution to your oil water separator cleaning to keep you functioning and in compliance. Our high capacity vacuum trucks can empty even the largest OWS and safely transport the oil, sludges, and solids to a facility for disposal. And if manned entry is required to ensure adequate cleaning, we can send in our specialized confined space entry technicians.

Lift Station Service and Cleaning

Lift stations and sumps present unique challenges when it comes to dewatering, sludge removal, or solids removal. That's where Prairie Industrial Group's fleet of Vacuum Trucks excel where others can't. These powerful high capacity units can provide the greatest recovery capacity at the deepest pumping depths to get your pits or sumps emptied out and back in service.

Whether it's a liquid, a solid, or somewhere in between, our vacuum trucks can suck it up and haul it off. Furthermore, our permitted non-hazardous disposal options allow us to provide a turnkey solution including recovery, transportation, and disposal.

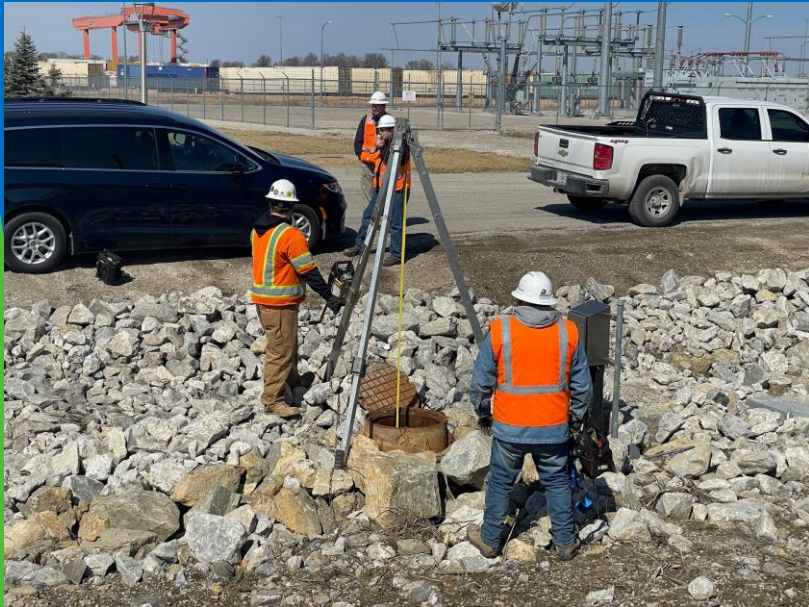

Confined Space and Rescue

Prairie Industrial Group offers Confined Space Standby Rescue as a service to our customers. As a safety-sensitive organization, Prairie Industrial Group makes safety our number one priority. Our highest objective is protecting our clients, the public, and our employees from harm.

Each year, hundreds of industry workers suffer needless injury, even death, due to inadequate and sometimes non-existent Confined Space Entry programs. When working in Permit Required Confined Spaces, OSHA regulations require a Confined Space Entry supervisor and attendant on the job site. If an OSHA job site inspection reveals non-compliance, OSHA can cite the employer with notices of violation, citations, and large monetary penalties. As a service to our clients, we provide confined space rescue services with teams of well-trained, experienced rescue professionals. Our rescue teams train multiple times every year to ensure our teams have the advanced knowledge needed to provide clients with rescue capabilities of all levels of complexity.

Hi-Rail Vacuum Truck Service

Prairie Industrial Group's railroad capabilities include High-Rail Vacuum Services. The High-Rail allows this specialized piece of equipment to access areas both in the rail yard and along the Right of Way, facilitating both planned and emergency clean-up activities. Prairie's employees and equipment operators are all FRA-trained to work along the Right of Way (ROW) for various railroads.

Atmospheric coatings and abrasive blasting

Long-term protection for your valves and tanks

Prairie Industrial Group offers comprehensive abrasive blasting and coating services to job sites across the Kansas City area and Midwest region. Utilizing a full fleet of state-of-the-art equipment, our team is capable of clearing your site's tanks of rust, surface coatings, debris, and dirt. We're also able to line the interior and exterior tanks with premium coating in order to ensure long-term protection against corrosion and contamination.

Hydrovac and Vacuum Truck Services

State-of-the-art equipment meets comprehensive service

Utilizing premium equipment and the latest hydrovac truck models, Prairie Industrial Group provides reliable hydrovac services to businesses across the Midwest! Our team of qualified operators and field personnel are highly trained and capable of performing a variety of different services, including:

- Hydro Excavation
- Air Excavation (Air Knifing)
- Potholing
- Utility Locating
- Micro Trenching
- Tank Cleaning
- Bore Support
- Debris Removal
- Line Jetting
- Remediation
- Rail Car Cleaning
- Waste Water Support
- Storm Water Support

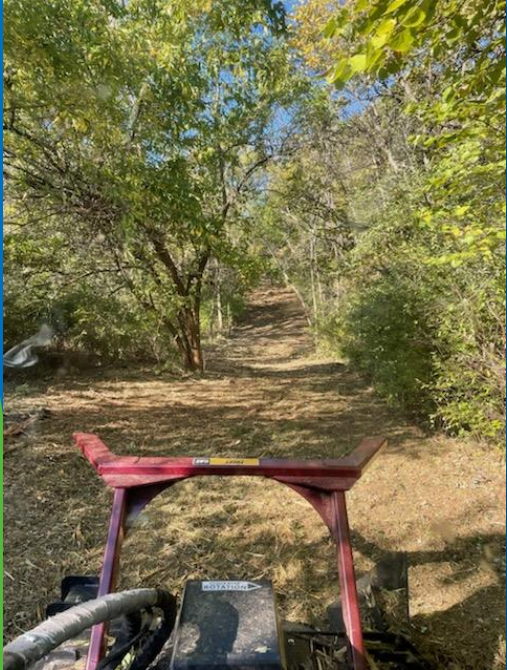

Right of Way Clearing and Maintenance

Responsible right-of-way maintenance

Prairie Industrial Group offers reliable right-of-way maintenance services to public utility companies and railroads across Kansas City and the Midwest. Our comprehensively trained specialists are capable of clearing out all vegetation and other natural factors in the area, as well as creating roadside ditches to prevent excessive water build-up. Most importantly, our team will work to ensure the complete satisfaction of your company and the long-term safety of the area.

Railcar Flaring and Zevac

Prairie Integrity is able to provide a fleet of smokeless, air-assist dual phase portable flare stacks, and internal combustion units, making Prairie Integrity one of the few companies capable of converting to gas and subsequently burning off a wide range of liquids and vapors. Our application specific flaring units can be rigged up within a matter of minutes, and once in operation, these self-contained units reliably burn off volatile liquid products in production pipelines, petrochemical plants import/export lines, rail cars, tanker trucks or any similar application requiring the safe removal of flammable liquids.
